
(a) algebraic connectivity λ_2 by layer-pair — quantized to $\{0, 1, 2\}$
NL base
formal notation
paraphrase, minimal edits
λ_2 (pooled, cosine affinity)
0
1
2
(b) paired difference — pre-registered primary endpoint
mean +0.360, 95% CI [0.211, 0.385]
pre-registered direction was NEGATIVE — sign is opposite
forced k=8: mean +0.094, Wilcoxon p = 0.56 (not robust to k)
mean $\Delta\lambda_2$ = +0.36
$\Delta\lambda_2$ (formal – NL base)
